Only inorganic pigments are used with **Si-Rex03** ensuring optimum fade resistance (color fastness) and coating durability on exteriors exposed to UV radiation, humidity and weathering.

All colorants are VOC (Volatile Organic Compounds) and APE (Alkyl Phenol Ethoxylate) free, making them fully compliant with latest requirements and anticipated regulations.

On-screen colors, or when printed out, may vary from the actual paint colors. **Si-Rex03** can be custom color matched to most colors (mineral matte finish only, bright organic colors excepted).
